

CLEAR TAPE IMAGE TRANSFER

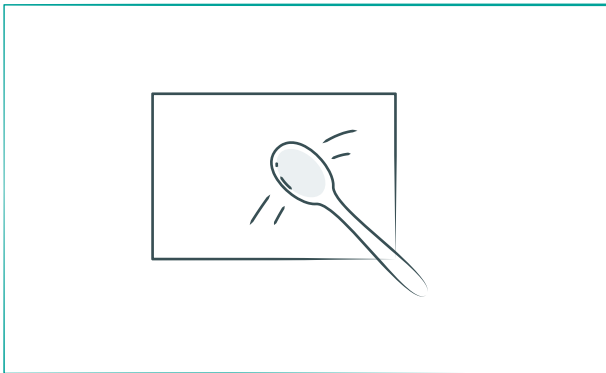

1. GATHER MATERIALS:

You will need an image to transfer, clear packaging tape, a burnishing tool (such as a spoon), a spray bottle with water, and scissors.

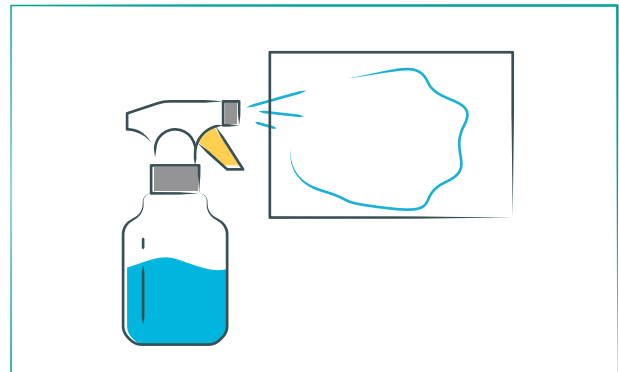

2. TAPE:

Layer clear tape over the entire image.

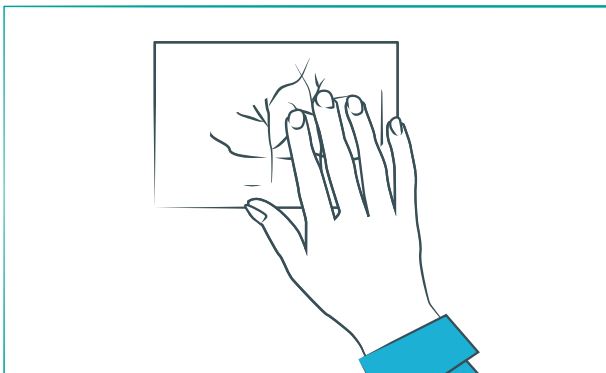

3. BURNISH:

Rub the image and tape together with a burnishing tool so that the image is completely adhered to the tape.

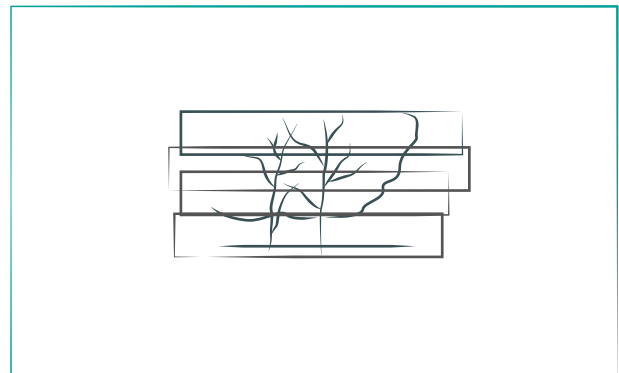

4. SPRAY:

Spray the paper with water on the back side until it is completely saturated.

5. RUB:

Rub the saturated paper to remove the unwanted paper. This will reveal the transfer.

6. REVEAL:

Once the excess paper is removed, the desired image will be revealed.
